

## OVERVIEW

The aim of this document is to provide the FIVB Officials with a standardised clear and concise method by which to communicate the results of the coin toss at Beach Volleyball matches.

During the all process of communication, referees must keep visual contact with the scorer and make sure the information is well received. Every piece of information must be confirmed before you move to the next.

The Scorers should pay attention to the coin toss and follow the process, however, only input information according to the 2nd referees' information.
